

E-Z POOL CARE GUIDE

E-Z Pool is a patented product designed to simplify the maintenance process. This first-of-its-kind concentrated blend creates a **PROACTIVE** program to prevent pool problems instead of treating them on a **REACTIVE** basis. Scientifically balanced to provide bottled-quality pool water, E-Z Pool keeps water clean, clear, balanced, algae and trouble-free.

- It is simple to use! Just once a week:
- Relieves Balance Anxiety
- Clarifies and Softens
- Inhibits Scaling
- Compatible with all Traditional Sanitizers

You will not need to figure out the right amount of chemicals to balance your pool each week - No more Algaecide, Stable Oxidizer, pH Balance, Softener, Scale Inhibitor, CH Balance, TA Balance and Clarifier. Just treat with E-Z Pool once a week and you will be swimming in no time! If all of that is not good enough to switch, E-Z Pool is eco-friendly so you will be doing your part to help the environment!

Weekly Maintenance:

E-Z Pool must be added on a weekly basis.

E-Z Pool and sanitizer should be maintained at a minimum 1.0 ppm "TC". We recommend using E-Z Pool with one 3" sanitizer tablet per 12,000 gallons in a floater, feeder, or skimmer.

Weekly Dosage Guide:

10,000 Gallons	= 3 E-Z Pool Scoops
15,000 Gallons	= 4 E-Z Pool Scoops
20,000 Gallons	= 5 E-Z Pool Scoops
25,000 Gallons	= 6 E-Z Pool Scoops
30,000 Gallons	= 7 E-Z Pool Scoops
35,000 Gallons	= 8 E-Z Pool Scoops
40,000 Gallons	= 9 E-Z Pool Scoops
45,000 Gallons	= 10 E-Z Pool Scoops
50,000 Gallons	= 11 E-Z Pool Scoops
