

Natural Chemistry Phos Free Pool Care Guide

Zero Phosphates, Zero Problem

PhosFree is the only patented product on the market that removes phosphates on the filter. Its easy application into the skimmer will not cloud your water.

- Reduces phosphate levels to near zero
- Will not cloud pool water
- Easy to use, just add to skimmer
- Non-toxic and will not harm the environment
- Compatible with all sanitizers and pool surfaces

Hassle Free Pool Maintenance

Pool Perfect + PhosFree is a natural product that reduces phosphates and organic waste to near zero in your pool. Use it to make your water feel soft and silky while preventing problems like; scum lines, organic staining, surface oils and phosphate build-up. Get the salt water feel without the salt!

- Prevents scum lines, organic staining and surface oils
 - Reduces skin & eye irritation and strong chemical odors
 - Reduces and maintains near zero phosphate levels
 - Compatible with all sanitizers and pool surfaces
 - Non-toxic and will not harm the environment
- Before using Pool Perfect + PhosFree you should always test your phosphate level and ensure that you are starting with a level between 0 and 300ppb
 - Phosphate tests need to be done on a clear algae-free pool
 - Test your phosphate level, along with your other water chemistry, weekly
 - Color is milky brown
 - Use 1 oz per 2000 gallons weekly added to the skimmer
 - For heavier bather loads the dosage may be increased weekly
 - You may swim immediately after adding

Chlorine / sanitizer levels above 6 ppm may deactivate the product.
